

Telescopic Conveyor

Telescopic Conveyor is the perfect labor-saving component to meet the demands of high-speed production lines in a wide range of industries for raw material unloading and finished goods loading in the carriage.

It is deluxe product for Loading/Unloading application with all necessary safety standards. It has heavy-duty design and durable construction requires minimal maintenance, thus assuring many years of dependable operation. Machine is having a very robust and vibration free body constructed on steel frame. It can also made with all food grade standards. User friendly and variable speed controls for conveyor speed make the operation easy to adjust as per output.

Only one employee is required to operate the Telescopic Conveyor.

Why Telescopic Conveyor?

- **Improve Speed** of operation.
- **Increases efficiency and productivity** for production lines
- It can work out for **any shape** like round, oval, square, etc. It is enable for **unsymmetrical shape** of container also
- Contact parts are **resistant to flaking, chipping, scuffing so will not cause any cosmetic damage** to containers
- **Saves money** through efficient use of personnel
- **Minimal operator training** required
- It is designed to load 100kg of weight at a time.
- Built to be **reliable, trouble-free and dependable** for years of operation
- INDIAN made-easy access **to spare parts and service assistance**

We have 3 types of conveyor available for truck loading:

1. Automatic Telescopic Conveyor:

Automatic Telescopic Conveyor is fully automatic equipment to meet the demands of high-speed production lines in a wide range of industries for raw material unloading and finished goods loading and unloading in the carriage. It is designed to provide angle change as per requirement. It can move in-out as per requirement with the telescopes

available with the help of electric motors and sensors.

2. Semi automatic Telescopic Conveyor:

Semi-automatic Telescopic Conveyor is equipment to meet the demands of high-speed production lines in a wide range of industries for raw material unloading and finished goods loading and unloading in the carriage. It can move in-out

as per requirement with the telescopes available with the help of castor wheels.

3. Loading Conveyor:

Loading Conveyor is the perfect labor-saving economic component to meet the demands of high-speed production lines in a wide range of industries for raw material unloading and finished goods loading in the carriage. It is designed to provide angle change as per requirement. It can move in-out as per requirement with the lockable

castor wheels.
